Request

Currently displayed image 2

The result of frontend request for image 2 from the backend.

GET /metadata/{id} Get element metadata by id

Gets metadata of the element at the requested index

Parameters Try it out

Name	Description
id * required number (path)	<input type="text" value="id"/>

Responses

Code	Description	Links
200	metadata	No links
503	The server is not configured correctly	No links

Media type

The `metadata get` functionality on the API end.

The bit to connect API to the blockchain failed, unsure how to construct the contract correctly.

```
